Introduction

The 1984 Statistical Yearbook published by the Commodity Exchange, Inc. (COMEX) contains a compilation of pertinent information for every contract traded on the Exchange during 1984. The yearbook is divided into two volumes, one each for metals and options.

The yearbook for metals begins with a trading summary for 1984 and is then divided into four main sections—gold, silver, copper and aluminum. Each section includes opening prices, high and low prices, closing and settlement prices, volume, open interest, stocks and deliveries for every COMEX trading day. Additional tables on related U.S. producer and dealer prices and London gold and silver fixings are also listed.

We know this yearbook will prove to be a valuable source for financial and speculative users of futures markets and to students of commodities trading. Additional copies of this yearbook and previous issues are available for a nominal fee from the Commodity Exchange, Inc., (COMEX), 4 World Trade Center, New York, NY 10048 (212) 938-2937.

1984 Trading Summary

Gold Futures

The U.S. economic environment had the dominant influence over gold prices and trading in 1984. Low inflation combined with record high real interest rate reduced investor interest in gold and prompted a surge of investment in interest-yielding assets. In addition, the strength of the dollar kept gold prices relatively high in foreign countries. This encouraged production and discouraged consumption abroad, even as prices fell in dollar terms.

In spite of these factors, the sale of physical gold increased by approximately two percent in 1984. Jewelry and industrial use increased about eight percent last year, accounting for approximately 72 percent of total gold consumption. The remainder of the metal was absorbed by investors at prices well below those of 1983.

The activity in COMEX gold futures totalled 9,115,504 contracts. Although annual activity in this product declined 12.2 percent, gold futures remained the Exchange's most active contract in 1984.

Prices for gold fell sharply during the year from a high of $405.50 per troy ounce on March 5 to a low of $304.70 on December 20. Year-end open interest in gold futures stood at 167,407 outstanding positions.

Silver Futures

The economic factors that resulted in lower prices for gold also affected silver prices. Reduced inflationary expectations and high levels of real interest rates discouraged demand for this metal. Mine production of silver rose in 1984, but political turmoil in India cut exports from this supplier, and recycling of silver declined. Total sales of physical silver declined nearly 10 percent from 1983. Fabrication use was unchanged from a year earlier. Industrial usage accounted for 73 percent of silver consumption in 1984.

Market activity at COMEX was a different story. COMEX silver futures achieved its second successive annual record with 6,742,508 contracts traded. Silver futures also registered a record monthly volume of 698,768 during February.

Silver prices ranged between a peak of $10.170 per troy ounce on March 5 and a low of $6.245 on December 20. Year-end open interest in silver was 80,300 outstanding contracts.

Copper Futures

Weak demand for capital goods prevented copper from enjoying anticipated increases in demand as the U.S. economy improved in early 1984. Mine and refinery closings, attempts to renegotiate labor contracts and concerns over excess capacity characterized the domestic industry in 1984. In addition, low production costs and a strong dollar increased the flow of foreign copper to North America, keeping a lid on prices.

Annual activity in COMEX copper futures was 2,506,365 contracts, down 21.4 percent from 1983 levels. Prices for copper reached their high for the year on March 30 at 71.10¢ per pound and their low on September 13 at 54.95¢ per pound. Open interest in copper on December 31 was 86,502 contracts.

Aluminum Futures

Steady increases in aluminum prices through 1983, coupled with optimistic price projections, drove U.S. aluminum capacity utilization above 90 percent by early 1984. While consumption remained steady throughout the year, customer inventory build-up slowed, and the export market dwindled. By mid-year, rising producer inventories and falling prices convinced domestic manufacturers to idle high-cost plants. At year-end, capacity utilization in the U.S. had dropped below 80 percent, and prices had fallen to a little more than half the level of a year earlier.

COMEX aluminum futures achieved an annual volume of 82,661 in 1984, the contract's first full year of trading. Prices for the metal ranged between a January 13 high of 78.70¢ per pound and a September 20 low of 45.35¢. Last-day open interest was 4,220.

Contract Specifications

	GOLD	SILVER
Trading Unit	100 troy ounces	5,000 troy ounces
Price Multiples and Fluctuations	Price changes are registered in multiples of ten cents (10¢) per troy ounce. During any one market day, price fluctuations are limited to twenty-five dollars ($25) per troy ounce above or below the settlement price established on the preceding business day. If, on two consecutive days, the settlement price for any contract month (not necessarily the same month) changes by the price fluctuation limit, a system of expanded limits becomes effective. Price fluctuation limits do not apply to the current delivery month.	Price changes are registered in multiples of one-tenth of one cent (1/10 of 1¢) per troy ounce. During any one market day, price fluctuations are limited to fifty cents (50¢) per troy ounce above or below the settlement price established on the preceding business day. If, on two consecutive days, the settlement price for any contract month (not necessarily the same month) changes by the price fluctuation limit, a system of expanded limits becomes effective. Price fluctuation limits do not apply to the current delivery month.
Trading Hours	9:00 AM to 2:30 PM New York Time	9:05 AM to 2:25 PM New York Time
Trading Months	Trading is conducted for delivery in the current calendar month, the next two calendar months, and such additional months as the Board of Governors may specify by resolution. Currently, trading is conducted in any February, April, June, August, October and December falling within a 23-month period beginning with the current calendar month.	Trading is conducted for delivery in the current calendar month, the next two calendar months, and such additional months as the Board of Governors may specify by resolution. Currently, trading is conducted in any January, March, May, July, September and December falling within a 23-month period beginning with the current calendar month.
Trading Symbol	GC	SI
Deliverable Grades and Contract Size	100 troy ounces (five percent more or less) of refined gold, assaying not less than 995 fineness, cast either in one bar, or in three one-kilogram bars and bearing a serial number and stamp of a refiner approved and listed by COMEX.	5,000 troy ounces (six percent more or less) of refined silver, assaying not less than 999 fineness, in bars cast in weights of 1,000 or 1,100 troy ounces and bearing a brand approved and listed by COMEX.

	COPPER	ALUMINUM
Trading Unit	25,000 pounds	40,000 pounds
Price Multiples and Fluctuations	Price changes are registered in multiples of five one-hundredths of a cent (5/100 of 1¢) per pound. During any one market day, price fluctuations are limited to five cents (5¢) per pound above or below the settlement price established on the preceding business day. If, on two consecutive days, the settlement price for any contract month (not necessarily the same month) changes by the price fluctuation limit, a system of expanded limits becomes effective. Price fluctuation limits do not apply to the current delivery month.	Price changes are registered in multiples of five one-hundredths of a cent (5/100 of 1¢) per pound. During any one market day, price fluctuations are limited to five cents (5¢) per pound above or below the settlement price established on the preceding business day. If, on two consecutive days, the settlement price for any contract month (not necessarily the same month) changes by the price fluctuation limit, a system of expanded limits becomes effective. Price fluctuation limits do not apply to the current delivery month.
Trading Hours	9:50 AM to 2:00 PM New York Time	9:30 AM to 2:15 PM New York Time
Trading Months	Trading is conducted for delivery in the current calendar month, the next two calendar months, and such additional months as the Board of Governors may specify by resolution. Currently, trading is conducted in any January, March, May, July, September and December falling within a 23-month period beginning with the current calendar month.	Trading is conducted for delivery in the current calendar month, the next two calendar months, and such additional months as the Board of Governors may specify by resolution. Currently, trading is conducted in any January, March, May, July, September and December falling within a 23-month period beginning with the current calendar month.
Trading Symbol	CU	AL
Deliverable Grades and Contract Size	25,000 pounds (two percent more or less) of electrolytic, lake, or certain types of fire-refined copper. The basis grade is electrolytic copper cathodes. Fire-refined high conductivity copper and lake copper are deliverable at the contract (basis) price. Depending on the particular refinery shape, electrolytic copper is deliverable at a premium of 5/8¢ or 1/4¢ per pound above the contract price. Fire-refined copper is deliverable at a discount of 1/8¢ per pound below the contract price. All deliverable copper must conform to specifications established by the American Society for Testing and Materials for the particular shape and grade involved and be of a brand approved and listed by COMEX.	40,000 pounds (two percent more or less) of virgin primary aluminum grade P1020A (in ingots, sows or T-bars) during one of the specified futures months. At the option of the seller, primary aluminum grade P1535A (in ingots, sows or T-bars) may also be delivered against the aluminum contract at a discount of one cent ($.01) per pound. Each lot must be composed entirely of one grade and shape. All deliverable aluminum must either a) bear the brand or distinguishable mark of an approved smelter, or b) be accompanied by a declaration of a COMEX clearing member as to the origin of the aluminum. Each lot of deliverable aluminum must be accompanied by the producer's heat analysis or by a certificate of analysis from a COMEX-approved assayer.

KEY TO ABBREVIATIONS

Opening Prices

@: Signifies an opening during which no trades were effected for the contract month. The quote which precedes the "@" is the prevailing bid in the market during the opening period while the price following the "@" represents the prevailing offer.

T: Signifies that at least one transaction was effected during the opening period. If transactions were effected at more than one price during the opening period in a contract month, the high and low prices for such months are shown surrounding the "T".

Closing and Settlement Futures Prices

C = Closing Price
S = Settlement Price
T = Traded price/prices

Volume of Contracts Traded

MT = Monthly Total

Introduction

The 1984 Statistical Yearbook published by the Commodity Exchange, Inc. (COMEX) contains a compilation of pertinent information for every contract traded on the Exchange during 1984. The yearbook is divided into two volumes, one each for metals and options.

The yearbook for options begins with a trading summary for 1984 and is then divided into two main sections—gold options and silver options. Each section includes high and low prices, closing and settlement prices, volume and open interest for puts and calls for every COMEX trading day. In addition, there is also a table listed for 1984 exercises.

We know this yearbook will prove to be a valuable source for financial and speculative users of futures and options markets and to students of commodities trading. Additional copies of this yearbook and previous issues are available for a nominal fee from the Commodity Exchange, Inc., (COMEX), 4 World Trade Center, New York, NY 10048 (212) 938-2937.

Trading Summary

Options on Gold Futures

Options on gold futures was the fastest growing COMEX product during 1984, the contract's second full year of trading, repeatedly setting new records and ultimately registering a 270.6 percent annual gain. A total of 1,432,514 gold options were traded during 1984.

Records set by gold options included annual volume (1,432,514 in 1984), monthly volume (151,848 contracts in May), weekly volume (52,635 from December 17-21), daily volume (17,721 on July 6) and open interest (117,973 contracts on November 8). Gold options open interest was 92,546 contracts at year-end.

The year 1984 also saw the conclusion of the first phase of a special Exchange Membership program introduced in September 1983. At that time, temporary gold options trading permits were issued to the 189 holders of COMEX Financial Instrument Permits (FIPs).

After a one-year qualification period that expired in September 1984, 169 permanent COMEX Option Memberships had been validated. The new option members now have permanent trading privileges in options on both gold and silver futures. Permits which were not qualified for conversion have expired.

Options on Silver Futures

COMEX options on silver futures, which began trading on October 4, 1984, achieved a volume of 99,843 contracts by year-end. This was nearly double the level of activity recorded by gold options during their first three-months of trading two years earlier. Year-end open interest for silver options totalled 30,023 contracts.

To enhance the development of the new contract, the Option Membership program was expanded in 1984 to include the sale of one hundred temporary permits for silver options. These permits became effective the day the new contract began trading and will be eligible for conversion within the next 12 months.

Contract Specifications

	GOLD OPTIONS	SILVER OPTIONS
Trading Unit	Underlying asset is equal to one Comex gold futures contract.	Underlying asset is equal to one Comex silver futures contract.
Price Multiples and Fluctuations	Price changes are registered in multiples of ten cents (10¢) per troy ounce. Strike Price Increments: $10/oz. apart for strike prices below $300. $20/oz. apart for strike prices between $300 and $500. $30/oz. apart for strike prices between $500 and $800. $40/oz. apart for strike prices above $800.
